SYED MUHAMMAD AKBAR RIZVI

Full-Stack Web Developer

Karachi, Pakistan | +92 335 1289116 | akbarrizvi112@gmail.com | portfolio | linkedin | github

EDUCATION

Sir Syed University of Engineering & Technology | **Current CGPA: 3.3** | **2023–2027**

TECHNICAL SKILLS

Frontend: React 19, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Recharts

Backend & APIs: Node.js, Express.js, Python, RESTful APIs, Axios, Fetch API, NextJS REST API integration

Tools & Practices: Git, GitHub, Vite, Postman, monorepos, clean architecture, responsive design, Claude, Codex, Antigravity

EXPERIENCE

Full-Stack Developer | **MedComply Platform** | **Freelance** | **06/2026-Present**

- Engineered and maintained responsive, reusable interfaces for an enterprise healthcare compliance and risk management platform using React.js, TypeScript, Vite, and Material UI across Admin, Client, and Compliance Connect modules.
- Integrated React and TypeScript interfaces with NestJS REST APIs, delivered new features, and resolved UI and functional defects within a monorepo while collaborating with cross-functional teams through Git-based workflows.

Frontend Developer | **Paws & Pour** | **Freelance** | **03/2026-06/2026**

- Engineered a responsive pet management dashboard supporting pet profiles, treat inventory, subscriptions, and safety logs using reusable React 19 and TypeScript components, Tailwind CSS layouts, and interactive Recharts visualizations.
- Implemented client-side routing, Axios-based API integration, and modular frontend architecture to deliver consistent dashboard experiences and support scalable, maintainable development.

Frontend Intern | **Sui Southern Gas Company (SSGC)** | **2-person team**

- Partnered with a development team to build an outsourced US WebProfessionals website using HTML, CSS, JavaScript, and Bootstrap.
- Implemented responsive Bootstrap layouts that maintained consistent presentation across desktop, tablet, and mobile screen sizes.

Frontend Developer | **110 Solutions** | **3-person team**

- Built a responsive website with HTML, CSS, and JavaScript to establish a functional and engaging digital presence.
- Enhanced cross-device usability by implementing interactive JavaScript features and adaptive page layouts.

PROJECTS

AI-Powered Interview Assistant | **Full-Stack Application**

- Created an AI-enabled platform that simulates both HR and technical interviews using a React.js frontend, Python backend, and Rasa-powered contextual conversations.
- Built a real-time monitoring pipeline with convolutional neural network models, TensorFlow, and OpenCV to analyze facial cues and engagement for performance feedback.

Paper Formatter System | **MERN Full-Stack Application**

- Developed a MERN stack and Python paper-formatting system with role-specific Teacher and Admin panels, supporting document uploads, question extraction, paper creation, preview, editing, and saving.
- Automated the Admin review and approval workflow to verify submitted content and generate approved, print-ready examination papers.

COMPETITIONS

Build With AI Hackathon | **4-person team**

- Collaborated in a four-person hackathon team to deliver an AI document reader using the MERN stack and Gemini API for targeted data extraction and retrieval.
- Implemented Python backend functionality and Fetch API communication to exchange data between application services.

Code Bash

- Solved algorithmic programming challenges under competition time constraints, demonstrating structured analysis and efficient solution development.

CERTIFICATIONS

- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents – Udemy (In progress)
- Introduction to Front-End Development – Meta
- CSS Certificate – HackerRank
- SQL Certificate – HackerRank
- Seminar Participation Certificate – IEE
